Amendment A – Issued to answer contractor questions.

SUBJECT: Request for Proposal (RFP) for Tracking Number DTOMC95023 (Repost)
Web Services Notification Support

Dear Program Manager:

1. The Defense Information Systems Agency (DISA) respectfully requests proposals for the attached Statement of Work (SOW) entitled, "Web Services Notification." The period of performance is for one year with two option years. For details of the requirement and evaluation criteria, please see Attachment #1, Statement of Work; Attachment #2, Evaluation Criteria; Attachment #3, DD254 Contract Security Classification Specification; and Attachment #4, Organizational Conflict of Interest.

Contract Type	Cost Plus Fixed Fee for labor & Firm Fixed Price SW Licenses, Maintenance, and Appliances
Period of Performance	One base year, 12 months with 2 one-year (12-months) options
Section 508 Applicable	No
Best Value or Low Price	Best Value Trade-Off
Proposal or No Bid Due	20 April 2009, 2:00 pm EST

2. **Question 1:** Is there an incumbent for the Web Services Notification requirement under DTOMC95023? If so could you please provide me the contract number, awardee name, award date, and amount? Or is this a new requirement?"

Answer: Currently, DISA does not have a contract in place for Web Services Notification.

Question 2: How many users will be supported on this JUM system?

Answer: The capabilities will be available to the DoD enterprise.

Question 3: What specific JUM services are being sought?

Answer: The integration and support services identified in the Statement of Work.

Question 4: In regards to Paragraph 6 of Attachment #1, Line 1, can you clarify what "program and services of record" are being referenced?

Answer: JUM capabilities will be integrated into some of the JCTDs and other programs/services of record, such as the NCES or GIG.

Question 5: Is there any measure of the LOE on this effort? Is there an anticipated number of resources required to perform the tasks or some other measure of the scope?

Answer: The government estimates approximately 27,000 hours of labor for the base year, with slightly decreasing LOEs in the option years.

Question 6: Can you add any clarification on the Location of Work? Anticipated percentage of work to be performed on Contractor site vs. DISA site(s)?

Answer: The amount of time at any one location has not been quantified. See paragraph 7 of the Statement of Work

Question 7: In regards to Costs, if we don't have DCAA incurred costs/approved indirect rates, but have a GSA schedule, is that sufficient?

Answer: In accordance with FAR 16.301-3(a)(1) regarding cost-reimbursement contracts, the contractor's accounting system must be adequate for determining costs applicable to the contract.

Question 8: The Statement of Work requires the use of proprietary software (Seros), please explain if this is a competitive or sole source award. Additionally, please provide further explanation as to how this requirement is being competed?

Answer: This requirement is being competed in accordance with FAR 6.2 - Full and open competition after exclusion of sources (100% small business set-aside). The Government intends to award a single contract resulting from the RFP to the responsible offeror whose proposal represents the **best value** in accordance with the factors in the solicitation. The Government will evaluate the proposals based on the criteria provided in Attachment 2 of the RFP in which all Non-Cost factors are significantly more important than Cost Factors when combined.

3. All questions asked have been addressed.

Respectfully,

//signed//

TERRY G. STENERSON
Contracting Officer
